Royal SHADOW

ES

Hay colores que no gritan: permanecen. Esta paleta de morados profundos nace donde la luz se repliega, en esa frontera densa en la que el negro empieza a tener color. Son tonos elegantes, con presencia, que rinden igual en acabados lisos que en relieves y texturas. El protagonista es el metal dorado envejecido: un oro cálido y satinado, de brillo contenido, que viste los accesorios con un aire de pieza heredada más que estrenada. Los detalles en mate suavizan el conjunto y dejan que el color y el metal hablen sin recargar. Una historia sofisticada, pensada para producto de gama alta y para colecciones de invierno donde el detalle marca la diferencia.

EN

There are colours that don't shout: they endure. This palette of deep purples is born where the light folds in on itself, at that dense border where black begins to take on colour. These are elegant tones, full of presence, that hold up just as well on smooth nishes as on reliefs and textures. The lead role belongs to aged gilded metal: a warm, satin gold of restrained shine, dressing the accessories with the air of a piece inherited rather than newly bought. The matte details soften the whole and let the colour and the metal speak without overloading. A sophisticated story, conceived for high-end product and for winter collections where the detail makes the difference.

Living SURFACE

ES

Lo vivo nunca está quieto. Esta paleta de verdes orgánicos y azules minerales late con la energía de lo natural y aporta frescura, carácter y un punto contemporáneo. Pide acabados marcados y juegos de color que se atrevan a destacar, donde el tono se convierte en textura y materia. El remate en metal hematita, un gris oscuro y profundo de aire técnico, equilibra la fuerza del color y añade una lectura mineral muy actual. Combinada con detalles en mate, brilla en componentes protagonistas y diseños que buscan diferenciarse: lo salvaje, pero con precisión.

EN

What is alive is never still. This palette of organic greens and mineral blues pulses with the energy of the natural world, bringing freshness, character and a contemporary edge. It calls for bold nishes and colour combinations that dare to stand out, where tone becomes texture and material. The hematite metal nish, a deep, dark grey with a technical feel, balances the strength of the colour and adds a very current mineral reading. Combined with matte details, it shines on statement components and designs that seek to stand apart: wild, but with precision.
